I have a question about USB type C cables. I am looking to buy a new cable on Amazon. Some indicate they are intended for iPhone 15 or 16. But I want to charge an iPad Pro, which also has a type C connector. As long as a cable has a type C connector, shouldn't any cable work with my iPad?

Great question — and the short answer is **yes, but with a few important caveats**.

AI Image Creation

- AI *creates* the image based on its training data.

- Does not search the internet and use existing photos.

PROMPT: Create photo of an orange tabby cat & a rose bush

  - Massive datasets of images and text
  - Understands what a "tabby cat" and a "rose bush" typically look like
  - Synthesizes a completely new image that matches the Prompt description.

Prompt: The question or instruction you give to Chatbot

- **Start with the Goal**
